JUDICIAL NOTIFICATIONS.

NOTIFICATIONS.

Under the provisions of section 122 of the Code of Civil Procedure, 1908, the following draft amendments of Rules 3 and 4 of Order XXXII and Form No. 11 of Appendix H to the First Schedule of the said Code are published for the information of all persons interested, and it is hereby notified that the draft amendments as well as any objections or suggestions which may be received in respect thereof from any person interested in the matter will be taken into consideration by the High Court on or after the 15th day of October 1913.

Draft amendments.

1. For Rules 3 and 4 of Order XXXII of Schedule I of the Code of Civil Procedure, 1908, substitute—

3 (1) Where the defendant is a minor, the Court, on being satisfied of the fact of his minority, shall appoint a proper person to be guardian for the suit for such minor.

(2) An order for the appointment of a guardian for the suit may be obtained upon application in the name and on behalf of the minor or by the plaintiff.

(3) Such application shall be supported by an affidavit verifying the fact that the proposed guardian has no interest in the matters in controversy in the suit adverse to that of the minor and that he is a fit person to be so appointed. The affidavit shall further state the name of the person or persons on whom notice has to be served under the provisions of sub-rule (5).

(4) An application for the appointment of a guardian for the suit of a minor shall not be combined with an application for bringing on record the legal representatives of a deceased plaintiff or defendant. The applications shall be by separate petitions.

(5) No order shall be made on any application under this rule except upon notice to any guardian of the minor appointed or declared by an authority competent in that behalf, or, where there is no such guardian, upon notice to the father or other natural guardian of the minor, or where there is no father or other natural guardian, to the person in whose care the minor is, and after hearing any objection which may be urged on behalf of any person served with notice under this sub-rule. The notice required by this sub-rule shall be served six clear days before the day named in the notice for the hearing of the application and may be in Form No. 11 set forth in Appendix H hereto.

4 (1) Any person who is of sound mind and has attained majority may act as next friend of a minor or as his guardian for the suit.

Provided that the interest of such person is not adverse to that of the minor and that he is not, in the case of a next friend, a defendant, or, in the case of a guardian for the suit, a plaintiff.

(2) Where a minor has a guardian appointed or declared by competent authority, no person other than such guardian shall act as the next friend of the minor or be appointed his guardian for the suit unless the Court considers, for reasons to be recorded, that it is for the minor's welfare that another person be permitted to act or be appointed, as the case may be.

(3) No person shall without his consent be appointed guardian for the suit. Whenever an application is made proposing the name of a person as guardian for the suit, a notice in Form No. 11-A set forth in appendix H hereto shall be served on the proposed guardian, unless the applicant himself be the proposed guardian or the proposed guardian consents.

(4) Where there is no other person fit and willing to act as guardian for the suit, the Court may appoint any of its officers to be such guardian, and may direct that the costs to be incurred by such officer in the performance of his duties as such guardian shall be borne either by the parties or by any one or more of the parties to the suit, or out of any fund in Court in which the minor is interested, and may give directions for the repayment or allowance of such costs as justice and the circumstances of the case may require.

(5) When a guardian for the suit of a minor defendant is appointed, and it is made to appear to the Court that the guardian is not in possession of any, or sufficient, funds for the conduct of the suit on behalf of the defendant, and that the defendant will be prejudiced in his defence thereby, the Court may, from time to time, order the plaintiff to advance moneys to the guardian for the purpose of his defence and all moneys so advanced shall form part of the costs of the plaintiff in the suit. The order shall direct that the guardian do, as and when directed, file in Court an account of the moneys so received by him.

2. Substitute for Form No. 11 of Appendix H to the said Code and add—

FORM No. 11.

Notice to Guardian appointed or declared, or, to father or other natural guardian, or, to the person in charge of the minor.

JUDICIAL NOTIFICATIONS.

NOTIFICATION.

Under the provisions of section 122 of the Code of Civil Procedure, 1908, the following draft amendments of Rules 3 and 4 of Order XXXII and Form No. 11 of Appendix H to the First Schedule of the said Code are published for the information of all persons interested, and it is hereby notified that the draft amendments as well as any objections or suggestions which may be received in respect thereof from any person interested in the matter will be taken into consideration by the High Court on or after the 15th day of October 1913.

Draft amendments.

1. For Rules 3 and 4 of Order XXXII of Schedule I of the Code of Civil Procedure, 1908, substitute—

3 (1) Where the defendant is a minor, the Court, on being satisfied of the fact of his minority, shall appoint a proper person to be guardian for the suit for such minor.

(2) An order for the appointment of a guardian for the suit may be obtained upon application in the name and on behalf of the minor or by the plaintiff.

(3) Such application shall be supported by an affidavit verifying the fact that the proposed guardian has no interest in the matters in controversy in the suit adverse to that of the minor and that he is a fit person to be so appointed. The affidavit shall further state the name of the person or persons on whom notice has to be served under the provisions of sub-rule (5).

(4) An application for the appointment of a guardian for the suit of a minor shall not be combined with an application for bringing on record the legal representatives of a deceased plaintiff or defendant. The applications shall be by separate petitions.

(5) No order shall be made on any application under this rule except upon notice to any guardian of the minor appointed or declared by an authority competent in that behalf, or, where there is no such guardian, upon notice to the father or other natural guardian of the minor, or where there is no father or other natural guardian, to the person in whose care the minor is, and after hearing any objection which may be urged on behalf of any person served with notice under this sub-rule. The notice required by this sub-rule shall be served six clear days before the day named in the notice for the hearing of the application and may be in Form No. 11 set forth in Appendix H hereto.

4 (1) Any person who is of sound mind and has attained majority may act as next friend of a minor or as his guardian for the suit:

Provided that the interest of such person is not adverse to that of the minor and that he is not, in the case of a next friend, a defendant, or, in the case of a guardian for the suit, a plaintiff.

(2) Where a minor has a guardian appointed or declared by competent authority, no person other than such guardian shall act as the next friend of the minor or be appointed his guardian for the suit unless the Court considers, for reasons to be recorded, that it is for the minor's welfare that another person be permitted to act or be appointed, as the case may be.

(3) No person shall without his consent be appointed guardian for the suit. Whenever an application is made proposing the name of a person as guardian for the suit, a notice in Form No. 11-A set forth in appendix H hereto shall be served on the proposed guardian, unless the applicant himself be the proposed guardian or the proposed guardian consents.

(4) Where there is no other person fit and willing to act as guardian for the suit, the Court may appoint any of its officers to be such guardian, and may direct that the costs to be incurred by such officer in the performance of his duties as such guardian shall be borne either by the parties or by any one or more of the parties to the suit, or out of any fund in Court in which the minor is interested, and may give directions for the repayment or allowance of such costs as justice and the circumstances of the case may require.

(5) When a guardian for the suit of a minor defendant is appointed, and it is made to appear to the Court that the guardian is not in possession of any, or sufficient, funds for the conduct of the suit on behalf of the defendant, and that the defendant will be prejudiced in his defence thereby, the Court may, from time to time, order the plaintiff to advance moneys to the guardian for the purpose of his defence and all moneys so advanced shall form part of the costs of the plaintiff in the suit. The order shall direct that the guardian do, as and when directed, file in Court an account of the moneys so received by him.

2. *Substitute* for Form No. 11 of Appendix H to the said Code and *add*—

JUDICIAL NOTIFICATIONS.

NOTIFICATIONS.

Under the provisions of section 122 of the Code of Civil Procedure, 1908, the following draft amendments of Rules 3 and 4 of Order XXXII and Form No. 11 of Appendix H to the First Schedule of the said Code are published for the information of all persons interested, and it is hereby notified that the draft amendments as well as any objections or suggestions which may be received in respect thereof from any person interested in the matter will be taken into consideration by the High Court on or after the 15th day of October 1913.

Draft amendments.

1. For Rules 3 and 4 of Order XXXII of Schedule I of the Code of Civil Procedure, 1908, substitute—

3 (1) Where the defendant is a minor, the Court, on being satisfied of the fact of his minority, shall appoint a proper person to be guardian for the suit for such minor.

(2) An order for the appointment of a guardian for the suit may be obtained upon application in the name and on behalf of the minor or by the plaintiff.

(3) Such application shall be supported by an affidavit verifying the fact that the proposed guardian has no interest in the matters in controversy in the suit adverse to that of the minor and that he is a fit person to be so appointed. The affidavit shall further state the name of the person or persons on whom notice has to be served under the provisions of sub-rule (5).

(4) An application for the appointment of a guardian for the suit of a minor shall not be combined with an application for bringing on record the legal representatives of a deceased plaintiff or defendant. The applications shall be by separate petitions.

(5) No order shall be made on any application under this rule except upon notice to any guardian of the minor appointed or declared by an authority competent in that behalf, or, where there is no such guardian, upon notice to the father or other natural guardian of the minor, or where there is no father or other natural guardian, to the person in whose care the minor is, and after hearing any objection which may be urged on behalf of any person served with notice under this sub-rule. The notice required by this sub-rule shall be served six clear days before the day named in the notice for the hearing of the application and may be in Form No. 11 set forth in Appendix H hereto.

4 (1) Any person who is of sound mind and has attained majority may act as next friend of a minor or as his guardian for the suit:

Provided that the interest of such person is not adverse to that of the minor and that he is not, in the case of a next friend, a defendant, or, in the case of a guardian for the suit, a plaintiff.

(2) Where a minor has a guardian appointed or declared by competent authority, no person other than such guardian shall act as the next friend of the minor or be appointed his guardian for the suit unless the Court considers, for reasons to be recorded, that it is for the minor's welfare that another person be permitted to act or be appointed, as the case may be.

(3) No person shall without his consent be appointed guardian for the suit. Whenever an application is made proposing the name of a person as guardian for the suit, a notice in Form No. 11-A set forth in appendix H hereto shall be served on the proposed guardian, unless the applicant himself be the proposed guardian or the proposed guardian consents.

(4) Where there is no other person fit and willing to act as guardian for the suit, the Court may appoint any of its officers to be such guardian, and may direct that the costs to be incurred by such officer in the performance of his duties as such guardian shall be borne either by the parties or by any one or more of the parties to the suit, or out of any fund in Court in which the minor is interested, and may give directions for the repayment or allowance of such costs as justice and the circumstances of the case may require.

(5) When a guardian for the suit of a minor defendant is appointed, and it is made to appear to the Court that the guardian is not in possession of any, or sufficient, funds for the conduct of the suit on behalf of the defendant, and that the defendant will be prejudiced in his defence thereby, the Court may, from time to time, order the plaintiff to advance moneys to the guardian for the purpose of his defence and all moneys so advanced shall form part of the costs of the plaintiff in the suit. The order shall direct that the guardian do, as and when directed, file in Court an account of the moneys so received by him.

2. *Substitute* for Form No. 11 of Appendix H to the said Code and *add*—

SALE OF SANDALWOOD.

SEALED tenders are invited for the purchase of the undermentioned description and approximate quantities of sandalwood stored in depots in Vellore, Tiruvannamalai and Tirupattur towns of the North Arcot district. SALE OF THE RIGHT OF MANUFACTURE OF SALT IN THE MOGALTUR FACTORY.

THE public are hereby informed that the right of manufacture of salt under modified excise system in the undermentioned salt pans in the Mogaltur factory will be sold by auction by the Inspector of Salt, Abkari and Customs Department, Mogaltur Circle, at his office at Lingnanaboyinacherla on Wednesday the 5th November 1913 subject to the following conditions.

2. A deposit of Rs. 10 must be made by every intending bidder previous to bidding
3. No person will be allowed to bid for another unless he holds a power-of-attorney from him authorizing him to do so.
4. The selling officer may, for valid reasons, refuse to accept any bid and, in cases of dispute, his decision shall be final. If, for any reason, the highest bid is rejected, the selling officer may, at his discretion, either accept the next highest bid or commence the sale again.

5. The sale will be subject to formal confirmation by the Deputy Commissioner who may either accept or reject the final bid at his discretion. Such formal confirmation will be tantamount to an acceptance of the bid.

6. As soon as possible after the auction is completed the deposits made by the unsuccessful bidders will be returned to them.

7. As the auction proceeds, each successful bidder shall at once, if so required by the selling officer or otherwise at the close of the day's sale, make a further deposit equal to one-fourth of the purchase money. Should he fail to do so, the deposit made by him under condition 2 *supra* will be forfeited and the pans will be put up to auction again on the above conditions or otherwise disposed of as the Deputy Commissioner may determine and the defaulter may be debarred from bidding again at any subsequent sales of salt pans by the Deputy Commissioner.

8. On receipt of intimation of the final acceptance of the bid, the successful bidder shall at once pay the whole amount of his bid after deducting from it the amount of deposits already paid by him. Should he fail to do so, the deposits made by him under conditions 2 and 7 *supra* will be forfeited and the salt pans will be sold or otherwise disposed of as the Deputy Commissioner may determine.

9. Resales effected under condition 8 will be at the risk of the defaulting bidder who will forfeit all gain and in the event of a loss, will be required to make good the deficiency between the amount payable under the terms of the original sale and that payable by the successful bidder at the resale. In the latter case the forfeited deposits will be deducted from the loss arising from the resale, and the remainder, if any, will be recoverable from the defaulter in the manner laid down in section 84 of the Madras Salt Act IV of 1889. Should, however, the forfeited deposits be greater than the loss by resale, the whole of such deposits will be credited to Government. The defaulter bidder will be similarly liable, if the salt pans are disposed of otherwise than by resale and such disposal results in the loss to Government as compared with the original sale.

10. The purchaser will be required to sign and deliver to the Commissioner a muchilika or engagement to observe all the conditions of the license to be granted to him. The prescribed form of muchilika and license can be seen at the office of the Inspector of the Mogaltur circle. The following special conditions will also be inserted in the licenses, muchilikas and leases:—

- (i) The pans should be aligned as directed by Government and on those lines only.
- (ii) Manufacture should be carried on as directed by Government and the licensees should undertake to comply with all orders of the Inspector in respect of the various processes of manufacture.
- (iii) The licensees should bear the cost of the necessary works and of the establishment charges in excess of 5 per cent. of the duty realized.
- (iv) The licensees should surrender the pans to Government without claiming compensation if they are called upon to do so on six months' notice before the commencement of the manufacturing season.

11. License to manufacture salt under the modified excise system will be granted to the successful bidder after he has accepted a lease (the form of which may be seen in the circle office). The term of such lease will ordinarily be for five years and the license granted in each case will be in force only during the continuance of such lease. In the event of the lease being determined before the expiry of the period fixed in consequence of the pans being at any time resumed by Government or of the factory being converted into one for manufacture of salt for general sale or for sale to Government as the case may be, the purchaser will not be entitled to any compensation.

REVENUE NOTIFICATIONS.

NOTIFICATIONS.

With the approval of Government, the Board of Revenue resolves to notify for the information of the public that the undermentioned draft of amended rule IV of the rules framed under section 32 of Madras Act II of 1894 will be taken up for consideration on or after 1st February 1914, and that all suggestions or objections relating to it should be submitted so as to reach the Board of Revenue before that date :—

Existing rule.

" IV. *Acting allowances of village officers.*—The rules laid down in the Civil Service Regulations as regards pay and acting allowances shall not apply to village officers paid from the Proprietary Estates' Village Service Fund. When a substitute is appointed during the absence of the permanent incumbent on leave or suspension, the whole pay of his office should be disbursed to the substitute, except when he holds office in another village, or holds a different office in the same village in which case the following rule should be observed :—

When a karnam, headman or talayari of a village discharges the duties of two or more villages or of an additional office in the same village, he may, with the sanction of the Divisional Officer, be granted the full pay of both or all the offices in question. This concession is only permissible in the case of short vacancies not exceeding three months. In cases, however, in which a village officer is made to do duty in two or more villages for a longer period, he will, in the absence of special orders to the contrary, be paid the pay allotted to the class corresponding to the combined revenue of both or all the villages."

Board of Revenue (Land Revenue),

No. 15.—Whereas it has been found necessary to take steps to control the preparation, possession and sale of denatured spirits in the Madras Presidency, the following rules have been framed by the Board of Revenue under sections 6, 11, 12, 13, 15, 17, 24 and 29 (m) of the Madras Abkari Act I of 1886 as amended by Madras Act I of 1905 and Act I of 1913, in supersession of the rules contained in Notification No. 10, dated 7th May 1913, published on pages 970-973 of Part II of the *Fort St. George Gazette*, dated 10th June 1913 :—

1. Denatured spirit is spirit rendered effectually and permanently unfit for human consumption by the admixture of light caoutchoucine and crude pyridine bases wholly made from a mineral source as per specifications appended, or wood-naphtha, or other special denaturants, approved of by the Board of Revenue.

2. Denatured spirits are liable to a duty of 5 per cent. *ad valorem*: the duty being calculated on the declared issue price of each consignment at the distillery, less the discount, if any, allowed to purchasers and the duty. Distillers should, when applying for a permit, declare the sale price of the spirit at the distillery for the purpose of calculating the *ad valorem* duty.

3. Denatured spirit may be manufactured by holders of distillery licenses in the Presidency, provided (1) that the light caoutchoucine and pyridine bases to be mixed with the spirit must first be tested and approved in the Board's Laboratory, (2) that they must be kept under lock and key by, and used under the supervision of, the distillery officer, (3) that they must be used in the proportion of $\frac{1}{2}$ a gallon of light caoutchoucine and $\frac{1}{2}$ a gallon of pyridine bases to 99 gallons of the spirit, and (4) that the spirit shall not be of less strength than 50 per cent. overproof. Similar conditions apply to the use of wood-naphtha, in the special cases where its use is permitted, with this difference that one part by volume of crude wood-naphtha of a strength not less than 50 per cent. overproof shall be mixed with nine parts of spirit and that the use of wood-naphtha in a highly purified condition will not be permitted. The Board's previous sanction should be obtained in cases of special methods of denaturation for spirit intended for use in particular arts and manufactures.

4. Spirit denatured with light caoutchoucine and pyridine bases may be imported by sea, but samples must be submitted to the Board's Laboratory and there certified to be fully denatured before it can be removed from the custom-house. In the case of imports by sea from other Presidencies a certificate from the Collector of Customs at the port of shipment to the effect that the spirit has been fully denatured with light caoutchoucine and pyridine bases as laid down in rule 3, may be accepted in lieu of the Board's report. Spirit that is not sufficiently denatured must either be denatured afresh or must pay duty at the full tariff rate. Spirit treated with wood-naphtha or other special denaturants can be imported only with the special sanction of the Board.

4 (a). Spirit denatured with light caoutchoucine and pyridine bases may be imported from other Presidencies by land with the previous permission of the Collector, provided that the spirit to be imported has been fully denatured as laid down in rule 3 and provided also that such spirit is transported from the frontier to its destination under cover of a permit in form M.S.—2 to be obtained from the Collector in each case. Spirits treated with wood-naphtha or other special denaturants can be imported by land only with the special sanction of the Board.

5. Licenses (M.S.—1) for sale of spirit denatured with light caoutchoucine and pyridine bases will be issued by Collectors, free of fee, to respectable applicants on their showing that they have a legitimate demand for such spirit. All such applications should be forwarded to the Collector through the Inspector of the Salt, Abkārī and Customs Department of the Circle in which the applicant wishes to hold his license. No such license will be issued to persons licensed to sell liquor for consumption on the premises.

6. The holders of M.S.—1 licenses may obtain their supplies of spirit from the custom-house or distillery on production of a written permission (M.S.—2) for the removal of the same from the Collector of the district in which the custom-house or distillery is situated. Books of form of application for such permission (M.S.—3) will be supplied to them. These applications should be forwarded to the Collectors concerned through the Collector of the district to which the applicant wishes to transport the spirit. The spirit may also be obtained from a depot licensed for the wholesale vend of the spirit in quantities not exceeding 120 gallons at a time or from other M.S.—1 licensees up to a maximum of 20 gallons at a time on presentation of a requisition in form M.S.—8. The licensees are also empowered to sell spirit to one another and to holders of M.S.—1-a licenses up to a maximum of 20 gallons at a time. The transport of spirit thus sold should be covered by a permit to be granted by the seller in each case. Books of permits (M.S.—9) for the transport of the spirit to be obtained from holders of M.S.—1 licenses in quantities exceeding one gallon but not exceeding 20 gallons will be issued to holders of these licenses on application to the Collector of the district in which they carry on their business.

Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (*a*) *supra*.

7. Varnish-makers and others requiring spirit denatured with light caoutchoucine and pyridine bases for use in their business, but not for sale, will be given special licenses (M.S.—1-a) on application, supported by evidence as to their requirements through the Inspector of the Circle, to the Collector of the district in which they carry on their business. They will be supplied by distillers or through the custom-house on presentation of a permit (M.S.—2) to be obtained from the Collector on application in form (M.S.—3). These licensees may also obtain their supply of spirit from a depot licensed for the wholesale vend of such spirit in quantities not exceeding 120 gallons at a time or from holders of M.S.—1 licenses up to a maximum of 20 gallons at a time. Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (*a*) *supra*.

8. Holders of M.S.—1 and M.S.—1-a licenses will, on application to the Collector of the district in which they carry on their business, be furnished with books of requisitions (M.S.—8) authorising them to obtain spirit denatured with light caoutchoucine and pyridine bases in quantities exceeding one gallon but not exceeding 20 gallons at a time from holders of M.S.—1 licenses, and in quantities not exceeding 120 gallons from a depot.

9. Similar licenses (M.S.—1-b) will be given to Chemists and others who, for special reasons, require spirit spoiled with wood-naphtha. The procedure will be the same except that (unless the Board has given a special authority to import) the spirit will be obtainable only from local distilleries and that the licensees will be required to enter into a bond (M.S.—4) with the Collector undertaking to use the spirit for the purpose specified and no other. The forms to be used in this case will be M.S.—1-b, M.S.—2, M.S.—3. Persons holding these licenses will also be allowed to sell such spirit up to a maximum of one reputed quart at a time, on the use of it being ordered in writing by a competent medical man. Such orders are to be retained by the seller in his stock book until the latter is inspected by an Abkārī officer.

10. A special license in form M.S.—1-c will be issued to the Railway Companies in the Presidency for the storage and use of spirit denatured with light caoutchoucine and pyridine bases and its distribution to such stations on their respective lines, as may be specified in the license, provided that the licensees enter into bond with the Collector undertaking to use the spirit for the purpose specified in the license and no other. The licensees may obtain their supplies of the spirit from the custom-house or distillery on production of a written permission (M.S.—2) to be obtained from the Collector of the district in which the custom-house or distillery is situated on application in form M.S.—3. The spirit may also be obtained from a depot licensed for the wholesale vend of the spirit up to a maximum of 220 gallons at a time on production of a requisition in form M.S.—8. Books of applications or requisitions may be had from the Collector of the district in which the license is held. The Railway Companies will be exempted from taking out separate licenses for individual stations for the possession and use of the spirit received from the M.S.—1-c premises. The transport of spirit should be covered by a permit (M.S.—9) to be granted by the licensees in each case. Denatured spirit may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (*a*) *supra*.

11. A special license in form M.S.—1-d will be granted to distillers, who are also manufacturers of denatured spirits for the wholesale vend of such spirits, manufactured in their distilleries, not exceeding 120 gallons at one time to holders of M.S.—1 and M.S.—1-a licenses and not exceeding 220 gallons at one time to holders of M.S.—1-c licenses on production of a requisition in form M.S.—8. The transport of the spirit so issued shall be covered by a permit in form M.S.—9 to be granted by the depot-keeper in each case.

12. The customs or distillery officer or wholesale depot-keeper concerned will send an advice in form M.S.—5 of each issue of denatured spirit that he makes to the Inspector of the Circle to which the spirit is consigned. This advice must be sent promptly at the time of issue. No issue of more than 500 gallons at any one time to any one person is permitted from a custom-house or distillery. The same limit will apply to imports of denatured spirits from other Presidencies by land. Collectors who permit such imports should at the same time advise the Inspectors concerned of the permission granted to them for such imports using the advice of M.S.—2 suitably amended.

13. Unlicensed persons are prohibited from selling denatured spirit, and from possessing more than one gallon at a time. The limit is fixed under section 13 of Act I of 1886. Breach of the rule will subject the offender to the penalties prescribed in the Act.

14. When insufficiently denatured spirit is again denatured under rule 5 *supra*, the importer will bear the expense.

15. The minimum strength at which imported and locally-made denatured spirit can be sold will be 50° over-proof.

APPENDIX.

OFFICIAL LABORATORY TESTS TO ASCERTAIN THE SUITABILITY OF SAMPLES OF LIGHT CAOUTCHOUCINE AND PYRIDINE BASES FOR DENATURING ALCOHOL.

Light caoutchoucine.

1. *Nature*.—By “caoutchoucine” is meant the liquid obtained by the dry distillation of vulcanised rubber. By “light caoutchoucine” is meant the liquid obtained by redistilling “caoutchoucine” and collecting that portion which passes over at or below about 200° C.

2. *The specific gravity of light caoutchoucine*.—The specific gravity of light caoutchoucine at 60° F. should lie between .835 and .860 referred to water as 1.000.

3. *Boiling test*.—For the purpose of this test, 100 c.c. of light caoutchoucine should be redistilled in the pyridine testing flask (see specification for pyridine bases). Under those conditions not more than 15 c.c. of distillate should pass over at or below 100° C. whilst a total (including the foregoing) of at least 70 c.c. should pass over at or below 200° C.

4. *Absence of soluble constituents*.—When 25 c.c. of light caoutchoucine are shaken with an equal volume of water in a stoppered graduated cylinder and due time is allowed for the liquids to separate again into two layers, the light caoutchoucine should show no appreciable diminution in volume.

5. *Neutrality*.—The aqueous layer obtained from test 4 should show no marked acidity or alkalinity when tested with both red and blue litmus paper.

6. *Limit of saturated hydrocarbons*.—At least 70 per cent. of the light caoutchoucine should be soluble in concentrated sulphuric acid. For testing this, 25 c.c. should be measured off into a tapped and stoppered separating-cylinder of suitable capacity and sulphuric acid should be added, at first with great care and in very small quantities. After each addition of acid, the cylinder should be shaken and cooled to avoid loss of volatile constituents. Sufficient acid must be used (usually about 50 c.c.) for the high coloured layer to become quite fluid so that it can separate readily from the upper layer of unattacked constituents. After a final thorough shaking and cooling, the cylinder should be left for about three hours to effect complete separation of the two layers and the lower layer be then tapped off. The almost colourless upper layer should be again shaken with strong sulphuric acid until it appears free from soluble constituents (as judged by the colour imparted to the sulphuric acid) and separated as before after standing. It should finally measure not more than 7 c.c.s. The acid used should be of specific gravity 1.84 and may be of commercial quality.

7. *Freedom from water*.—Light caoutchoucine should not contain any appreciable amount of water. Any officer engaged in drawing samples for test should certify on the bottle that he has drawn the sample from the bottom of the containing vessel where the water, if present, will be found. For this purpose he should employ a syphon tube of which the shorter limb reaches to the floor of the containing vessel. He should also assure himself that the sample is collected in a bottle free of moisture.

Pyridine bases.

I. Colour.—The colour must not be darker than that given by two cubic centimetres of decinormal iodine solution dissolved in one litre of distilled water.

II. Miscibility with water.—20 c.c. of the pyridine bases should give a clear mixture with 40 c.c. of water; or else a mixture only so slightly opalescent that, after standing for five minutes, ordinary newspaper type is clearly visible through a layer 15 c.m. deep.

III. Amount of water present.—From 20 c.c. of the pyridine bases mixed with 20 c.c. of caustic soda solution (density 1.4), at least 18.5 c.c. of the bases should separate, after having been repeatedly shaken together and allowed to stand.

IV. Titration.—Dissolve 1 c.c. of the pyridine bases in 10 c.c. of distilled water. Titrate with normal sulphuric acid until a drop of the mixture gives a definite blue spot on congo-red paper (the blue colour should at once disappear). At least 10 c.c. of the normal sulphuric acid should be required to produce this reaction. (To prepare the congo-red paper, dissolve one gram of congo-red in one litre of distilled water. Soak filter paper in this and then dry).

V. Cadmium chloride reaction.—Vigorously shake together 10 c.c. of a solution of 1 c.c. of pyridine bases in 100 c.c. of distilled water with 5 c.c. of a 5 per cent. solution of dry fused cadmium chloride. A distinct crystalline precipitate should immediately result.

VI. Boiling-point.—Distil 100 c.c. of the pyridine bases in the manner described below. At least 90 per cent. should distil over at or under 140° C.

Method.—100 c.c. of pyridine bases are placed in a short-necked copper flask of about 200 c.c. capacity. The flask is arranged on an asbestos card which has a circular hole of 30 m.m. diameter cut in it. To the flask is attached a fractionating column (consisting of a tube 13 m.m. wide and 170 m.m. long, provided with one bulb) of which the side-tube (issuing 1 c.m. above the bulb) joins a Liebig's condenser of which the cooled part is at least 400 m.m. long. A standard thermometer is placed in the head of the column so that its bulb occupies the centre of the bulb of the column.

The speed of distillation is adjusted to 5 c.c. per minute, the distillate being received in a graduated glass-cylinder. At least 90 c.c. should distil over at or under 140° C. at a barometric pressure of 760 m.m.

If the barometer varies from 760 m.m., a correction of 1° C. for each 30 m.m. of variation should be applied (*e.g.*, under 770 m.m. of pressure 90 c.c. of distillate should come over at or under 140.3° C., whilst under 750 m.m. the same amount of distillate should come over at 139.7° C.).

NOTE.—Pyridine proper is a single definite compound (C_5H_5N) boiling at about 116° C. Pyridine bases are mixtures of pyridine with closely allied compounds boiling at various temperatures. They are cheaper and more effective denaturants than the pure pyridine.

REVENUE NOTIFICATIONS.

NOTIFICATION.

No. 15.—Whereas it has been found necessary to take steps to control the preparation, possession and sale of denatured spirits in the Madras Presidency, the following rules have been framed by the Board of Revenue under sections 6, 11, 12, 13, 15, 17, 24 and 29 (*m*) of the Madras Abkari Act I of 1886 as amended by Madras Act I of 1905 and Act I of 1913, in supersession of the rules contained in Notification No. 10, dated 7th May 1913, published on pages 970-973 of Part II of the *Fort St. George Gazette*, dated 10th June 1913:—

1. Denatured spirit is spirit rendered effectually and permanently unfit for human consumption by the admixture of light caoutchoucine and crude pyridine bases wholly made from a mineral source as per specifications appended, or wood-naphtha, or other special denaturants, approved of by the Board of Revenue.

2. Denatured spirits are liable to a duty of 5 per cent *ad valorem*: the duty being calculated on the declared issue price of each consignment at the distillery, less the discount, if any, allowed to purchasers and the duty. Distillers should, when applying for a permit, declare the sale price of the spirit at the distillery for the purpose of calculating the *ad valorem* duty.

3. Denatured spirit may be manufactured by holders of distillery licenses in the Presidency, provided (1) that the light caoutchoucine and pyridine bases to be mixed with the spirit must first be tested and approved in the Board's Laboratory, (2) that they must be kept under lock and key by, and used under the supervision of, the distillery officer, (3) that they must be used in the proportion of $\frac{1}{2}$ a gallon of light caoutchoucine and $\frac{1}{2}$ a gallon of pyridine to 20 gallons of the spirit, and (4) that the spirit shall not be of less strength than 50 per cent. overproof. Similar conditions apply to the use of wood-naphtha, in the special cases where its use is permitted, with this difference that one part by volume of crude wood-naphtha of a strength not less than 50 per cent. overproof shall be mixed with nine parts of spirit and that the use of wood-naphtha in a highly purified condition will not be permitted. The Board's previous sanction should be obtained in cases of special methods of denaturation for spirit intended for use in particular arts and manufactures.

4. Spirit denatured with light caoutchoucine and pyridine bases may be imported by sea, but samples must be submitted to the Board's Laboratory and there certified to be fully denatured before it can be removed from the custom-house. In the case of imports by sea from other Presidencies a certificate from the Collector of Customs at the port of shipment to the effect that the spirit has been fully denatured with light caoutchoucine and pyridine bases as laid down in rule 3, may be accepted in lieu of the Board's report. Spirit that is not sufficiently denatured must either be denatured afresh or must pay duty at the full tariff rate. Spirit treated with wood-naphtha or other special denaturants can be imported only with the special sanction of the Board.

4 (a). Spirit denatured with light caoutchoucine and pyridine bases may be imported from other Presidencies by land with the previous permission of the Collector, provided that the spirit to be imported has been fully denatured as laid down in rule 3 and provided also that such spirit is transported from the frontier to its destination under cover of a permit in form M.S.—2 to be obtained from the Collector in each case. Spirits treated with wood-naphtha or other special denaturants can be imported by land only with the special sanction of the Board.

5. Licenses (M.S.—1) for sale of spirit denatured with light caoutchoucine and pyridine bases will be issued by Collectors, free of fee, to respectable applicants on their showing that they have a legitimate demand for such spirit. All such applications should be forwarded to the Collector through the Inspector of the Salt, Abkari and Customs Department of the Circle in which the applicant wishes to hold his license. No such license will be issued to persons licensed to sell liquor for consumption on the premises.

6. The holders of M.S.—1 licenses may obtain their supplies of spirit from the custom-house or distillery on production of a written permission (M.S.—2) for the removal of the same from the Collector of the district in which the custom-house or distillery is situated. Books of form of application for such permission (M.S.—3) will be supplied to them. These applications should be forwarded to the Collectors concerned through the Collector of the district to which the applicant wishes to transport the spirit. The spirit may also be obtained from a depot licensed for the wholesale vend of the spirit in quantities not exceeding 120 gallons at a time or from other M.S.—1 licensees up to a maximum of 20 gallons at a time on presentation of a requisition in form M.S.—8. The licensees are also empowered to sell spirit to one another and to holders of M.S.—1-a licenses up to a maximum of 20 gallons at a time. The transport of spirit thus sold should be covered by a permit to be granted by the seller in each case. Books of permits (M.S.—9) for the transport of the spirit to be obtained from holders of M.S.—1 licenses in quantities exceeding one gallon but not exceeding 20 gallons will be issued to holders of these licenses on application to the Collector of the district in which they carry on their business.

Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (a) *supra*.

7. Varnish-makers and others requiring spirit denatured with light caoutchoucine and pyridine bases for use in their business, but not for sale, will be given special licenses (M.S.—1-a) on application, supported by evidence as to their requirements through the Inspector of the Circle, to the Collector of the district in which they carry on their business. They will be supplied by distillers or through the custom-house on presentation of a permit (M.S.—2) to be obtained from the Collector on application in form (M.S.—3). These licensees may also obtain their supply of spirit from a depot licensed for the wholesale vend of such spirit in quantities not exceeding 120 gallons at a time or from holders of M.S.—1 licenses up to a maximum of 20 gallons at a time. Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (a) *supra*.

8. Holders of M.S.—1 and M.S.—1-a licenses will, on application to the Collector of the district in which they carry on their business, be furnished with books of requisitions (M.S.—8) authorising them to obtain spirit denatured with light caoutchoucine and pyridine bases in quantities exceeding one gallon but not exceeding 20 gallons at a time from holders of M.S.—1 licenses, and in quantities not exceeding 120 gallons from a depot.

9. Similar licenses (M.S.—1-b) will be given to Chemists and others who, for special reasons, require spirit spoiled with wood-naphtha. The procedure will be the same except that (unless the Board has given a special authority to import) the spirit will be obtainable only from local distilleries and that the licensees will be required to enter into a bond (M.S.—4) with the Collector undertaking to use the spirit for the purpose specified and no other. The forms to be used in this case will be M.S.—1-b, M.S.—2, M.S.—3. Persons holding these licenses will also be allowed to sell such spirit up to a maximum of one reputed quart at a time, on the use of it being ordered in writing by a competent medical man. Such orders are to be retained by the seller in his stock book until the latter is inspected by an Abkāri officer.

10. A special license in form M.S.—1-c will be issued to the Railway Companies in the Presidency for the storage and use of spirit denatured with light caoutchoucine and pyridine bases and its distribution to such stations on their respective lines, as may be specified in the license, provided that the licensees enter into bond with the Collector undertaking to use the spirit for the purpose specified in the license and no other. The licensees may obtain their supplies of the spirit from the custom-house or distillery on production of a written permission (M.S.—2) to be obtained from the Collector of the district in which the custom-house or distillery is situated on application in form M.S.—3. The spirit may also be obtained from a depot licensed for the wholesale vend of the spirit up to a maximum of 220 gallons at a time on production of a requisition in form M.S.—8. Books of applications or requisitions may be had from the Collector of the district in which the license is held. The Railway Companies will be exempted from taking out separate licenses for individual stations for the possession and use of the spirit received from the M.S.—1-c premises. The transport of spirit should be covered by a permit (M.S.—9) to be granted by the licensees in each case. Denatured spirit may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (a) *supra*.

11. A special license in form M.S.—1-d will be granted to distillers, who are also manufacturers of denatured spirits for the wholesale vend of such spirits, manufactured in their distilleries, not exceeding 120 gallons at one time to holders of M.S.—1 and M.S.—1-a licenses and not exceeding 220 gallons at one time to holders of M.S.—1-c licenses on production of a requisition in form M.S.—8. The transport of the spirit so issued shall be covered by a permit in form M.S.—9 to be granted by the depot-keeper in each case.

12. The customs or distillery officer or wholesale depot-keeper concerned will send an advice in form M.S.—5 of each issue of denatured spirit that he makes to the Inspector of the Circle to which the spirit is consigned. This advice must be sent promptly at the time of issue. No issue of more than 500 gallons at any one time to any one person is permitted from a custom-house or distillery. The same limit will apply to imports of denatured spirits from other Presidencies by land. Collectors who permit such imports should at the same time advise the Inspectors concerned of the permission granted to them for such imports using the advice of M.S.—2 suitably amended.

13. Unlicensed persons are prohibited from selling denatured spirit, and from possessing more than one gallon at a time. The limit is fixed under section 13 of Act I of 1886. Breach of the rule will subject the offender to the penalties prescribed in the Act.

14. When insufficiently denatured spirit is again denatured under rule 4 *supra*, the importer will bear the expense.

15. The minimum strength at which imported and locally-made denatured spirit can be sold will be 50° over-proof.

APPENDIX.

OFFICIAL LABORATORY TESTS TO ASCERTAIN THE SUITABILITY OF SAMPLES OF LIGHT CAOUTCHOUCINE AND PYRIDINE BASES FOR DENATURING ALCOHOL.

Light caoutchoucine.

1. *Nature.*—By “caoutchoucine” is meant the liquid obtained by the dry distillation of vulcanised rubber. By “light caoutchoucine” is meant the liquid obtained by redistilling “caoutchoucine” and collecting that portion which passes over at or below about 200° C.

2. *The specific gravity of light caoutchoucine.*—The specific gravity of light caoutchoucine at 60° F. should lie between .835 and .860 referred to water as 1.000.

3. *Boiling test.*—For the purpose of this test, 100 c.c. of light caoutchoucine should be redistilled in the pyridine testing flask (see specification for pyridine bases). Under those conditions not more than 15 c.c. of distillate should pass over at or below 100° C. whilst a total (including the foregoing) of at least 70 c.c. should pass over at or below 200° C.

4. *Absence of soluble constituents.*—When 25 c.c. of light caoutchoucine are shaken with an equal volume of water in a stoppered graduated cylinder and due time is allowed for the liquids to separate again into two layers, the light caoutchoucine should show no appreciable diminution in volume.

5. *Neutrality.*—The aqueous layer obtained from test 4 should show no marked acidity or alkalinity when tested with both red and blue litmus paper.

6. *Limit of saturated hydrocarbons.*—At least 70 per cent. of the light caoutchoucine should be soluble in concentrated sulphuric acid. For testing this, 25 c.c. should be measured off into a tapped and stoppered separating-cylinder of suitable capacity and sulphuric acid should be added, at first with great care and in very small quantities. After each addition of acid, the cylinder should be shaken and cooled to avoid loss of volatile constituents. Sufficient acid must be used (usually about 50 c.c.) for the high coloured layer to become quite fluid so that it can separate readily from the upper layer of unattacked constituents. After a final thorough shaking and cooling, the cylinder should be left for about three hours to effect complete separation of the two layers and the lower layer be then tapped off. The almost colourless upper layer should be again shaken with strong sulphuric acid until it appears free from soluble constituents (as judged by the colour imparted to the sulphuric acid) and separated as before after standing. It should finally measure not more than 7 c.c. The acid used should be of specific gravity 1.84 and may be of commercial quality.

7. *Freedom from water.*—Light caoutchoucine should not contain any appreciable amount of water. Any officer engaged in drawing samples for test should certify on the bottle that he has drawn the sample from the bottom of the containing vessel where the water, if present, will be found. For this purpose he should employ a syphon tube of which the shorter limb reaches to the floor of the containing vessel. He should also assure himself that the sample is collected in a bottle free of moisture.

Pyridine bases.

I. Colour.—The colour must not be darker than that given by two cubic centimetres of decinormal iodine solution dissolved in one litre of distilled water

II. Miscibility with water.—20 c.c. of the pyridine bases should give a clear mixture with 40 c.c. of water; or else a mixture only so slightly opalescent that, after standing for five minutes, ordinary newspaper type is clearly visible through a layer 15 c.m. deep.

III. Amount of water present.—From 20 c.c. of the pyridine bases mixed with 20 c.c. of caustic soda solution (density 1.4), at least 18.5 c.c. of the bases should separate, after having been repeatedly shaken together and allowed to stand.

IV. Titration.—Dissolve 1 c.c. of the pyridine bases in 10 c.c. of distilled water. Titrate with normal sulphuric acid until a drop of the mixture gives a definite blue spot on congo-red paper (the blue colour should at once disappear). At least 10 c.c. of the normal sulphuric acid should be required to produce this reaction. (To prepare the congo-red paper, dissolve one gram of congo-red in one litre of distilled water. Soak filter paper in this and then dry).

V. Cadmium chloride reaction.—Vigorously shake together 10 c.c. of a solution of 1 c.c. of pyridine bases in 100 c.c. of distilled water with 5 c.c. of a 5 per cent. solution of dry fused cadmium chloride. A distinct crystalline precipitate should immediately result.

VI. Boiling-point.—Distil 100 c.c. of the pyridine bases in the manner described below. At least 90 per cent. should distil over at or under 140° C.

Method.—100 c.c. of pyridine bases are placed in a short-necked copper flask of about 200 c.c. capacity. The flask is arranged on an asbestos card which has a circular hole of 30 m.m. diameter cut in it. To the flask is attached a fractionating column (consisting of a tube 13 m.m. wide and 170 m.m. long, provided with one bulb) of which the side-tube (issuing 1 c.m. above the bulb) joins a Liebig's condenser of which the cooled part is at least 400 m.m. long. A standard thermometer is placed in the head of the column so that its bulb occupies the centre of the bulb of the column.

The speed of distillation is adjusted to 5 c.c. per minute, the distillate being received in a graduated glass-cylinder. At least 90 c.c. should distil over at or under 140° C. at a barometric pressure of 760 m.m.

If the barometer varies from 760 m.m., a correction of 1° C. for each 30 m.m. of variation should be applied (*e.g.*, under 770 m.m. of pressure 90 c.c. of distillate should come over at or under 140.3° C., whilst under 750 m.m. the same amount of distillate should come over at 139.7° C.).

NOTE.—Pyridine proper is a single definite compound (C_5H_5N) boiling at about 116° C. Pyridine bases are mixtures of pyridine with closely allied compounds boiling at various temperatures. They are cheaper and more effective denaturants than the pure pyridine.

REVENUE NOTIFICATIONS.

NOTIFICATION.

No. 15.—Whereas it has been found necessary to take steps to control the preparation, possession and sale of denatured spirits in the Madras Presidency, the following rules have been framed by the Board of Revenue under sections 6, 11, 12, 13, 15, 17, 24 and 29 (m) of the Madras Abkārī Act I of 1886 as amended by Madras Act I of 1905 and Act I of 1913, in supersession of the rules contained in Notification No. 10, dated 7th May 1913, published on pages 970-973 of Part II of the *Fort St. George Gazette*, dated 10th June 1913 :—

1. Denatured spirit is spirit rendered effectually and permanently unfit for human consumption by the admixture of light caoutchoucine and crude pyridine bases wholly made from a mineral source as per specifications appended, or wood-naphtha, or other special denaturants, approved of by the Board of Revenue.

2. Denatured spirits are liable to a duty of 5 per cent. *ad valorem* : the duty being calculated on the declared issue price of each consignment at the distillery, less the discount, if any, allowed to purchasers and the duty. Distillers should, when applying for a permit, declare the sale price of the spirit at the distillery for the purpose of calculating the *ad valorem* duty.

3. Denatured spirit may be manufactured by holders of distillery licenses in the Presidency provided (1) that the light caoutchoucine and pyridine bases to be mixed with the spirit must first be tested and approved in the Board's Laboratory, (2) that they must be kept under lock and key by, and used under the supervision of, the distillery officer, (3) that they must be used in the proportion of $\frac{1}{2}$ a gallon of light caoutchoucine and $\frac{1}{2}$ a gallon of pyridine bases to 99 gallons of the spirit, and (4) that the spirit shall not be of less strength than 50 per cent. overproof. Similar conditions apply to the use of wood-naphtha, in the special cases where its use is permitted, with this difference that one part by volume of crude wood-naphtha of a strength not less than 50 per cent. overproof shall be mixed with nine parts of spirit and that the use of wood-naphtha in a highly purified condition will not be permitted. The Board's previous sanction should be obtained in cases of special methods of denaturation for spirit intended for use in particular arts and manufactures.

4. Spirit denatured with light caoutchoucine and pyridine bases may be imported by sea, but samples must be submitted to the Board's Laboratory and there certified to be fully denatured before it can be removed from the custom-house. In the case of imports by sea from other Presidencies a certificate from the Collector of Customs at the port of shipment to the effect that the spirit has been fully denatured with light caoutchoucine and pyridine bases as laid down in rule 3, may be accepted in lieu of the Board's report. Spirit that is not sufficiently denatured must either be denatured afresh or must pay duty at the full tariff rate. Spirit treated with wood-naphtha or other special denaturants can be imported only with the special sanction of the Board.

4 (a). Spirit denatured with light caoutchoucine and pyridine bases may be imported from other Presidencies by land with the previous permission of the Collector, provided that the spirit to be imported has been fully denatured as laid down in rule 3 and provided also that such spirit is transported from the frontier to its destination under cover of a permit in form M.S.—2 to be obtained from the Collector in each case. Spirits treated with wood-naphtha or other special denaturants can be imported by land only with the special sanction of the Board.

5. Licenses (M.S.—1) for sale of spirit denatured with light caoutchoucine and pyridine bases will be issued by Collectors, free of fee, to respectable applicants on their showing that they have a legitimate demand for such spirit. All such applications should be forwarded to the Collector through the Inspector of the Salt, Abkārī and Customs Department of the Circle in which the applicant wishes to hold his license. No such license will be issued to persons licensed to sell liquor for consumption on the premises.

6. The holders of M.S.—1 licenses may obtain their supplies of spirit from the custom-house or distillery on production of a written permission (M.S.—2) for the removal of the same from the Collector of the district in which the custom-house or distillery is situated. Books of form of application for such permission (M.S.—3) will be supplied to them. These applications should be forwarded to the Collectors concerned through the Collector of the district to which the applicant wishes to transport the spirit. The spirit may also be obtained from a depot licensed for the wholesale vend of the spirit in quantities not exceeding 120 gallons at a time or from other M.S.—1 licensees up to a maximum of 20 gallons at a time on presentation of a requisition in form M.S.—8. The licensees are also empowered to sell spirit to one another and to holders of M.S.—1-a licenses up to a maximum of 20 gallons at a time. The transport of spirit thus sold should be covered by a permit to be granted by the seller in each case. Books of permits (M.S.—9) for the transport of the spirit to be obtained from holders of M.S.—1 licenses in quantities exceeding one gallon but not exceeding 20 gallons will be issued to holders of these licenses on application to the Collector of the district in which they carry on their business.

Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (a) *supra*.

7. Varnish-makers and others requiring spirit denatured with light caoutchoucine and pyridine bases for use in their business, but not for sale, will be given special licenses (M.S.—1-a) on application, supported by evidence as to their requirements through the Inspector of the Circle, to the Collector of the district in which they carry on their business. They will be supplied by distillers or through the custom-house on presentation of a permit (M.S.—2) to be obtained from the Collector on application in form (M.S.—3). These licensees may also obtain their supply of spirit from a depot licensed for the wholesale vend of such spirit in quantities not exceeding 120 gallons at a time or from holders of M.S.—1 licenses up to a maximum of 20 gallons at a time. Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (a) *supra*.

8. Holders of M.S.—1 and M.S.—1-a licenses will, on application to the Collector of the district in which they carry on their business, be furnished with books of requisitions (M.S.—8) authorising

them to obtain spirit denatured with light caoutchoucine and pyridine bases in quantities exceeding one gallon but not exceeding 20 gallons at a time from holders of M.S.—1 licenses, and in quantities not exceeding 120 gallons from a depot.

9. Similar licenses (M.S.—1-b) will be given to Chemists and others who, for special reasons, require spirit spoiled with wood-naphtha. The procedure will be the same except that (unless the Board has given a special authority to import) the spirit will be obtainable only from local distilleries and that the licensees will be required to enter into a bond (M.S.—4) with the Collector undertaking to use the spirit for the purpose specified and no other. The forms to be used in this case will be M.S.—1-b, M.S.—2, M.S.—3. Persons holding these licenses will also be allowed to sell such spirit up to a maximum of one reputed quart at a time, on the use of it being ordered in writing by a competent medical man. Such orders are to be retained by the seller in his stock book until the latter is inspected by an Abkārī officer.

10. A special license in form M.S.—1-c will be issued to the Railway Companies in the Presidency for the storage and use of spirit denatured with light caoutchoucine and pyridine bases and its distribution to such stations on their respective lines, as may be specified in the license, provided that the licensee enter into bond with the Collector undertaking to use the spirit for the purpose specified in the license and no other. The licensees may obtain their supplies of the spirit from the custom-house or distillery on production of a written permission (M.S.—2) to be obtained from the Collector of the district in which the custom-house or distillery is situated on application in form M.S.—3. The spirit may also be obtained from a depot licensed for the wholesale vend of the spirit up to a maximum of 220 gallons at a time on production of a requisition in form M.S.—8. Books of applications or requisitions may be had from the Collector of the district in which the license is held. The Railway Companies will be exempted from taking out separate licenses for individual stations for the possession and use of the spirit received from the M.S.—1-c premises. The transport of spirit should be covered by a permit (M.S.—9) to be granted by the licensees in each case. Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (*o*) *supra*.

11. A special license in form M.S.—1-d will be granted to distillers, who are also manufacturers of denatured spirits, for the wholesale vend of such spirits, manufactured in their distilleries, not exceeding 120 gallons at one time to holders of M.S.—1 and M.S.—1-a licenses and not exceeding 220 gallons at one time to holders of M.S.—1-c licenses on production of a requisition in form M.S.—8. The transport of the spirit so issued shall be covered by a permit in form M.S.—9 to be granted by the depot-keeper in each case.

12. The customs or distillery officer or wholesale depot-keeper concerned will send an advice in form M.S.—5 of each issue of denatured spirit that he makes to the Inspector of the Circle to which the spirit is consigned. This advice must be sent promptly at the time of issue. No issue of more than 500 gallons at any one time to any one person is permitted from a custom-house or distillery. The same limit will apply to imports of denatured spirits from other Presidencies by land. Collectors who permit such imports should at the same time advise the Inspectors concerned of the permission granted by them for such imports, using the advice of M.S.—2 suitably amended.

13. Unlicensed persons are prohibited from selling denatured spirit, and from possessing more than one gallon at a time. The limit is fixed under section 13 of Act I of 1886. Breach of the rule will subject the offender to the penalties prescribed in the Act.

14. When insufficiently denatured spirit is again denatured under rule 5 *supra*, the importer will bear the expense.

15. The minimum strength at which imported and locally-made denatured spirit can be sold will be 50° over-proof.

APPENDIX.

OFFICIAL LABORATORY TESTS TO ASCERTAIN THE SUITABILITY OF SAMPLES OF LIGHT CAOUTCHOUCINE AND PYRIDINE BASES FOR DENATURING ALCOHOL.

Light caoutchoucine.

1. *Nature*.—By “caoutchoucine” is meant the liquid obtained by the dry distillation of vulcanised rubber. By “light caoutchoucine” is meant the liquid obtained by redistilling “caoutchoucine” and collecting that portion which passes over at or below about 200° C.

2. *The specific gravity of light caoutchoucine*.—The specific gravity of light caoutchoucine at 60° F. should lie between .835 and .860 referred to water as 1.000.

3. *Boiling test*.—For the purpose of this test, 100 c.c. of light caoutchoucine should be redistilled in the pyridine testing flask (see specification for pyridine bases). Under those conditions not more than 15 c.c. of distillate should pass over at or below 100° C. whilst a total (including the foregoing) of at least 70 c.c. should pass over at or below 200° C.

4. *Absence of soluble constituents*.—When 25 c.c. of light caoutchoucine are shaken with an equal volume of water in a stoppered graduated cylinder and due time is allowed for the liquids to separate again into two layers, the light caoutchoucine should show no appreciable diminution in volume.

5. *Neutrality*.—The aqueous layer obtained from test 4 should show no marked acidity or alkalinity when tested with both red and blue litmus paper.

6. *Limit of saturated hydrocarbons*.—At least 70 per cent. of the light caoutchoucine should be soluble in concentrated sulphuric acid. For testing this, 25 c.c. should be measured off into a tapped and stoppered separating-cylinder of suitable capacity and sulphuric acid should be added, at first with great care and in very small quantities. After each addition of acid, the cylinder should be shaken and cooled to avoid loss of volatile constituents. Sufficient acid must be used (usually about 50 c.c.) for the high coloured layer to become quite fluid so that it can separate readily from the upper layer of unattacked constituents. After a final thorough shaking and cooling, the cylinder should be left for about three hours to effect complete separation of the two layers and the lower layer be then

tapped off. The almost colourless upper layer should be again shaken with strong sulphuric acid until it appears free from soluble constituents (as judged by the colour imparted to the sulphuric acid) and separated as before after standing. It should finally measure not more than 7 c.cs. The acid used should be of specific gravity 1.84 and may be of commercial quality.

7. *Freedom from water.*—Light caoutchoucine should not contain any appreciable amount of water. Any officer engaged in drawing samples for test should certify on the bottle that he has drawn the sample from the bottom of the containing vessel where the water, if present, will be found. For this purpose he should employ a syphon tube of which the shorter limb reaches to the floor of the containing vessel. He should also assure himself that the sample is collected in a bottle free of moisture.

Pyridine bases.

I. *Colour.*—The colour must not be darker than that given by two cubic centimetres of decinormal iodine solution dissolved in one litre of distilled water.

II. *Miscibility with water.*—20 c.c. of the pyridine bases should give a clear mixture with 40 c.c. of water; or else a mixture only so slightly opalescent that, after standing for five minutes, ordinary newspaper type is clearly visible through a layer 15 c.m. deep.

III. *Amount of water present.*—From 20 c.c. of the pyridine bases mixed with 20 c.c. of caustic soda solution (density 1.4), at least 18.5 c.c. of the bases should separate, after having been repeatedly shaken together and allowed to stand.

IV. *Titration.*—Dissolve 1 c.c. of the pyridine bases in 10 c.c. of distilled water. Titrate with normal sulphuric acid until a drop of the mixture gives a definite blue spot on congo-red paper (the blue colour should at once disappear). At least 10 c.c. of the normal sulphuric acid should be required to produce this reaction. (To prepare the congo-red paper, dissolve one gram of congo-red in one litre of distilled water. Soak filter paper in this and then dry.)

V. *Cadmium chloride reaction.*—Vigorously shake together 10 c.c. of a solution of 1 c.c. of pyridine bases in 100 c.c. of distilled water with 5 c.c. of a 5 per cent. solution of dry fused cadmium chloride. A distinct crystalline precipitate should immediately result.

VI. *Boiling-point.*—Distil 100 c.c. of the pyridine bases in the manner described below. At least 90 per cent. should distil over at or under 140° C.

Method.—100 c.c. of pyridine bases are placed in a short-necked copper flask of about 200 c.c. capacity. The flask is arranged on an asbestos card which has a circular hole of 30 m.m. diameter cut in it. To the flask is attached a fractionating column (consisting of a tube 13 m.m. wide and 170 m.m. long, provided with one bulb) of which the side-tube (issuing 1 c.m. above the bulb) joins a Liebig's condenser of which the cooled part is at least 400 m.m. long. A standard thermometer is placed in the head of the column so that its bulb occupies the centre of the bulb of the column.

The speed of distillation is adjusted to 5 c.c. per minute, the distillate being received in a graduated glass-cylinder. At least 90 c.c. should distil over at or under 140° C. at a barometric pressure of 760 m.m.

If the barometer varies from 760 m.m., a correction of 1° C. for each 30 m.m. of variation should be applied (e.g., under 770 m.m. of pressure 90 c.c. of distillate should come over at or under 140.3° C., whilst under 750 m.m. the same amount of distillate should come over at 139.7° C.).

NOTE.—Pyridine proper is a single definite compound (C_5H_5N) boiling at about 116° C. Pyridine bases are mixtures of pyridine with closely allied compounds boiling at various temperatures. They are cheaper and more effective denaturants than the pure pyridine.

6. That if from any cause whatever the purchase shall not be completed by the 30th day from the day of sale, then the purchaser shall pay to the Collector interest at the rate of Rs. 12 per cent. per annum on the remainder of his purchase-money from the day of sale until the purchase shall be completed, without prejudice nevertheless to the right of re-sale reserved by the following condition, provided, however, that the whole of the purchase-money with interest shall be paid within one year from the date of sale.

Some of the essential conditions of the agreement are —

(a) The contractor should deposit a sum of Rs. 1,000 for the due fulfilment of the contract.

(b) The contractor must begin work punctually on 1st May with at least 35 coolies always on the work for the period of the contract and to ensure this there must be at least 50 coolies on the contractor's roll. There shall be a fine of Rs. 5 per day for every day's delay in the commencement of the work after the 1st May 1914.

(c) The contractor must undertake to exercise personal supervision and not leave the work entirely to his agents and further the contractor must inspect the work within seven days of being required to do so by the District Forest Officer.

(d) The contractor must pay the coolies punctually and regularly at intervals not exceeding seven days.

(e) The contract is based on the actual experience of past years and there is nothing in it which is unreasonable and consequently the terms of the contract will be strictly enforced.

(f) The supply of elephants will not be guaranteed, but any departmental elephant, at the option of the District Forest Officer, may be supplied at the usual rates of hire subject to the rules of the department regulating their use.

7. The period of contract will be one year from 1st May 1914 to 1st May 1915 and in the case of lump sum contract the amount of the contract must be paid in two equal instalments on or before 1st June and 1st August 1914. Failure to make payments on the due dates entails cancellation of the contract and forfeiture of all wood unremoved; the District Forest Officer may however condone late payment if sufficient cause is shown and interest at the rate of 6 per cent. per annum is paid on the arrears from the due date to the actual date of payment.

8. The District Forest Officer is not bound to accept the highest or any tender.

9. Further particulars can be had on application to the undersigned.

10. The contractors must read the tender notice carefully and confine their tenders to the terms of the notice; failing which their offer will be treated as per tender notice.

11. The usual upkeep of roads will be made by this department, but if this is not sufficient the contractor must do any further work required himself.

Conditions of Lump Sum Contract.

1. Felling shall commence from 1st May and close before 30th November 1914. All trees must be cut as close to the ground as possible (without defacing the hammer mark) in order to avoid unnecessary waste of timber. There shall be a fine of Rs. 5 per day for every day's delay in commencing the work after the 1st May 1914.

2. The contractor shall continuously employ not less than 35 men throughout the period of felling and it will be necessary therefore for him to have at least 50 men on his rolls. The contractor must pay the coolies regularly on every Saturday evening punctually for all work done during the week. For this purpose the contractor must keep his local agent amply supplied with funds.

3. The trees shall be felled by sub-coupes and each sub-coupe continuously from north to south or *vice versa* in accordance with the requirements of condition 4. The contractor shall not commence work in a new sub-coupe until the sub coupe working has been completely finished and inspected and passed by the Range Officer.

4. In each sub-coupe the felling shall commence farthest away from the forest depots and the logs must be dragged in the order in which they are felled. By this means the debris of felled trees will not interfere with the dragging.

5. The contractor shall not deface or remove the tree number or the range stamp or the stamp of any tree felled or to be felled.

6. The contractor shall fell only such trees as are marked for felling, a list of such trees being furnished to him.

7. The contractor is bound to fell all trees marked for felling and shall pay a fine of Rs. 10 per marked tree left unfelled on the 30th November 1914. If trees happen to fall on to other trees and remain resting against them the contractor is to bring such trees to the ground then and there and not leave them in their dangerous position for days together.

8. Any tree felled which has not been marked will be charged Rs. 1 per inch of girth measurement of the stump at ground level and the District Forest Officer is at liberty to levy Rs. 150 for each stump if the stumps are removed. As soon as a tree is felled by axemen they are to see that the tree number is visible on the face of the trunk as well as on the stump.

9. If any tree not marked is damaged by the careless felling of a marked tree, the contractor shall pay a fine of not less than Rs. 10 for each such tree damaged.

10. The contractor is not entitled to hire any Government elephant. If any Government elephants are available, the District Forest Officer may, if he likes, allow their use on a payment of Rs. 5 per day for each elephant. A sum of Rs. 500 should be deposited in the Post Office Savings Bank as security for the prompt payment of elephant hire. All logs to be dragged by departmental elephants shall have the drag hole ends sloped off from each side towards the centre so that the log may tend to ride over the ground instead of cutting into it. The elephants will not be worked for more than 20 days (20) in a month and the working hours will be from 8 to 11 A.M. in the morning and from 2 to 5 P.M. in the evening in the months of December, January and February and in the other months from 11 A.M. to 4 P.M. No elephant is to drag a log of more than 50 c.ft. and no elephant is to be used for dragging after 31st January 1915. When hoisting logs above 80 c.ft. for sawing the contractor is to employ more than one elephant. The contractor or his maistry must have the sawing pits dug close to the tree to be sawn and not far away from it which entails unnecessary dragging on the elephants. Range officer will issue a bill for the hire of elephants at the end of each month and the amount must be paid within 15 days of receipt of the bill. Each Government elephant has a prescribed maximum beyond which it may not drag. This schedule of working maximum will be supplied to the contractor. The contractor, if he decides to remove logs exceeding the maxima set forth in the schedule, will have to make his own arrangements for extracting such logs.

11. The contractor is at liberty to engage other than departmental elephants and shall pay for the green fodder consumed by such elephants the seignorage fees at Rs. 7-8-0 per mensem for each elephant.

12. All the converted logs will be dragged to forest depots selected by the range officer in each sub-coupe which shall be situated as far as possible on the road side in convenient localities wherefrom further transport by carts can be easily effected. There shall not be more than two such depots in any sub-coupe. All logs left in the sub-coupes undragged to depots on 31st January following the date of sale will be the sole property of Government and the contractor shall have no claim to them nor reimbursement of any expenditure incurred by him on account of such logs.

13. The department will not be responsible for any damage any felled logs or trees may suffer while within the limits of the forests.

14. The contractor shall pay 50 per cent. of the contract amount by 1st June and the balance by the 1st August 1914.

15. As soon as a sufficient number of logs has been dragged to the forest depots the contractor or his agent shall inform the range officer of the same and the range officer will measure and sale hammer the logs before further removal. No logs shall be removed from the depots before being so sale-hammered.

16. The department is at liberty to measure any tree or log or count rings at any time in order to obtain sylvicultural or other statistics, and for that purpose the department may place chalk, tar, pencil or other temporary marks on any tree or log.

17. All logs must be cross sawn and departmental saws if available will be supplied on a payment of Rs. 5 (five) for each saw for the season.

18. When logs are being dragged, the contractor must depute one man solely to attend on the dragging by each elephant in order to remove obstructions from the logs or elephants.

19. The contractor will be responsible for any fire that may be caused in the forests by his negligence or that of his agents, coolies or cartmen.

20. The contractor shall be allowed time till 1st June 1915 for the removal of the logs stored in the coupe forest depots and any log not removed beyond the limits of the coupes by the last day abovenamed will be the property of the Government and the contractor shall have no claim to the same or to a refund of any expenditure incurred by him in the felling, chipping or dragging thereof nor for the amount paid by him on account of such logs.

21. If the contractor has sold any logs and the purchaser fails to remove them within the time prescribed the department has no concern with the purchaser and the contractor shall be liable for any suit which the purchaser may file. No transfer of the contract can be effected without the sanction of the District Forest Officer and no such transfer will be considered valid unless the same is executed by a power of attorney presented in person and the transferee certifies that he agrees to abide by these conditions.

22. The contractor may not dispose of branch-wood or any wood he does not use himself to others without obtaining the permission of the District Forest Officer.

23. No extension of time will be allowed to the contractor under any circumstances.

Any breach of any of the above conditions will entail cancellation of the contract with effect from the date of such breach and forfeiture without compensation of all timber whether cut or standing remaining in the reserve on that date.

Conditions for cubic foot contract.

1. Felling shall commence from 1st May and close before the 30th November 1914. All trees must be cut as close to the ground as possible (without defacing the hammer mark) in order to avoid unnecessary waste of timber. There shall be a fine of Rs. 5 per day for every day's delay in commencing the work after the 1st May 1914.

6. The contractor shall fell only such trees as are marked for felling, a list of such trees being furnished to him. Felling shall be done in consecutive order. Picking and choosing will not be allowed.

7. The contractor is bound to fell all trees marked for felling and shall pay a fine of Rs. 10 per each marked tree left unfelled on the 30th November 1914. No logs shall be removed from the depots before being so paid for and sale hammered.

The contents so obtained must be accepted by the contractor as correct provided that if the drag hole is cut unnecessarily far from the end the full length of the log will be taken in the calculation.

The contents so obtained shall be accepted as correct by the contractor.

(d) The contractor or his agent shall be present after due notice has been given of the time of measurement. If he has any objection to make he must do it in writing to the District Forest officer on the same day. Failing such objection and whether he is present or not after due notice has been given, the Range officer's measurement must be accepted as correct and the logs will thenceforward be at the contractor's risk.

4. Tenders must be sent in registered covers to the address of the District Forest Officer, North Malabar, Munnally, and clearly marked on the outside of the cover with the words "Tenders for standing trees". The tenders will be opened by the District Forest Officer on the 15th February 1914 and each tender must be accompanied by deposit of Rs. 300 in Treasury chalangas as forest deposit and not as forest remittance. Money orders or notes will not be received, and if sent no responsibility on them will be accepted. The deposit of unsuccessful tenderers will be returned as soon as possible.

5. Each tender must refer to the whole area to be felled in the coupe and the tenderer may offer a lump sum for the whole area or a rate per c ft. of each kind of timber extracted.

6. The successful tenderer will, within a fortnight of the receipt of the intimation of the acceptance of his tender or tenders, execute an agreement with the District Forest Officer. For each day's delay (through the fault of the contractor beyond the time allowed) to execute the agreement, the contractor will be fined Re. 1. Some of the essential conditions of the agreement are :—

(a) The contractor should deposit a sum of Rs. 1,000 for the due fulfilment of the contract.

(b) The contractor must begin work punctually on 1st May with at least 35 coolies always on the work for the period of the contract and to ensure this there must be at least 50 coolies on the contractor's roll. There shall be a fine of Rs. 5 per day for every day's delay in the commencement of the work after the 1st May 1914.

(c) The contractor must undertake to exercise personal supervision and not leave the work entirely to his agents and further the contractor must inspect the work within seven days of being required to do so by the District Forest Officer.

(d) The contractor must pay the coolies punctually and regularly at intervals not exceeding seven days.

(e) The contract is based on the actual experience of past years and there is nothing in it which is unreasonable and consequently the terms of the contract will be strictly enforced.

(f) The supply of elephants will not be guaranteed, but any departmental elephant, at the option of the District Forest Officer, may be supplied at the usual rates of hire subject to the rules of the department regulating their use.

7. The period of contract will be one year from 1st May 1914 to 1st May 1915 and in the case of lump sum contract the amount of the contract must be paid in two equal instalments on or before 1st June and 1st August 1914. Failure to make payments on the due dates entails cancellation of the contract and forfeiture of all wood unremoved; the District Forest Officer may however condone late payment if sufficient cause is shown and interest at the rate of 6 per cent. per annum is paid on the arrears from the due date to the actual date of payment.

8. The District Forest Officer is not bound to accept the highest or any tender.

9. Further particulars can be had on application to the undersigned.

10. The contractors must read the tender notice carefully and confine their tenders to the terms of the notice; failing which their offer will be treated as per tender notice.

11. The usual upkeep of roads will be made by this department, but if this is not sufficient the contractor must do any further work required himself.

Conditions of Lump Sum Contract.

1. Felling shall commence from 1st May and close before 30th November 1914. All trees must be cut as close to the ground as possible (without defacing the hammer mark) in order to avoid unnecessary waste of timber. There shall be a fine of Rs. 5 per day for every day's delay in commencing the work after the 1st May 1914.

2. The contractor shall continuously employ not less than 35 men throughout the period of felling and it will be necessary therefore for him to have at least 50 men on his rolls. The contractor must pay the coolies regularly on every Saturday evening punctually for all work done during the week. For this purpose the contractor must keep his local agent amply supplied with funds.

3. The trees shall be felled by sub-coups and each sub-coupe continuously from north to south or *vice versa* in accordance with the requirements of condition 4. The contractor shall not commence work in a new sub-coupe until the sub coupe working has been completely finished and inspected and passed by the Range Officer.

4. In each sub-coupe the felling shall commence farthest away from the forest depots and the logs must be dragged in the order in which they are felled. By this means the debris of felled trees will not interfere with the dragging.

5. The contractor shall not deface or remove the tree number or the range stamp or the stamp of any tree felled or to be felled.

6. The contractor shall fell only such trees as are marked for felling, a list of such trees being furnished to him.

7. The contractor is bound to fell all trees marked for felling and shall pay a fine of Rs. 10 per marked tree left unfelled on the 30th November 1914. If trees happen to fall on to other trees and remain resting against them the contractor is to bring such trees to the ground then and there and not leave them in their dangerous position for days together.

8. Any tree felled which has not been marked will be charged Rs. 1 per inch of girth measurement of the stump at ground level and the District Forest Officer is at liberty to levy Rs. 150 for each stump if the stumps are removed. As soon as a tree is felled by axemen they are to see that the tree number is visible on the face of the trunk as well as on the stump.

9. If any tree not marked is damaged by the careless felling of a marked tree, the contractor shall pay a fine of not less than Rs. 10 for each such tree damaged.

10. The contractor is not entitled to hire any Government elephant. If any Government elephants are available, the District Forest Officer may, if he likes, allow their use on a payment of Rs. 5 per day for each elephant. A sum of Rs. 500 should be deposited in the Post Office Savings Bank as security for the prompt payment of elephant hire. All logs to be dragged by departmental elephants shall have the drag hole ends sloped off from each side towards the centre so that the log may tend to ride over the ground instead of cutting into it. The elephants will not be worked for more than 20 days (20) in a month and the working hours will be from 8 to 11 A.M. in the morning and from 2 to 5 P.M. in the evening in the months of December, January and February and in the other months from 11 A.M. to 4 P.M. No elephant is to drag a log of more than 50 c.ft. and no elephant is to be used for dragging after 31st January 1915. When hoisting logs above 80 c.ft. for sawing the contractor is to employ more than one elephant. The contractor or his maistry must have the sawing pits dug close to the tree to be sawn and not far away from it which entails unnecessary dragging on the elephants. Range officer will issue a bill for the hire of elephants at the end of each month and the amount must be paid within 15 days of receipt of the bill. Each Government elephant has a prescribed maximum beyond which it may not drag. This schedule of working maximum will be supplied to the contractor. The contractor, if he decides to remove logs exceeding the maxima set forth in the schedule, will have to make his own arrangements for extracting such logs.

11. The contractor is at liberty to engage other than departmental elephants and shall pay for the green fodder consumed by such elephants the seignorage fees at Rs. 7-8-0 per mensem for each elephant.

12. All the converted logs will be dragged to forest depots selected by the range officer in each sub-coupe which shall be situated as far as possible on the road side in convenient localities wherefrom further transport by carts can be easily effected. There shall not be more than two such depots in any sub-coupe. All logs left in the sub-coupes undragged to depots on 31st January following the date of sale will be the sole property of Government and the contractor shall have no claim to them nor reimbursement of any expenditure incurred by him on account of such logs.

13. The department will not be responsible for any damage any felled logs or trees may suffer while within the limits of the forests.

14. The contractor shall pay 50 per cent. of the contract amount by 1st June and the balance by the 1st August 1914.

15. As soon as a sufficient number of logs has been dragged to the forest depots the contractor or his agent shall inform the range officer of the same and the range officer will measure and sale hammer the logs before further removal. No logs shall be removed from the depots before being so sale-hammered.

16. The department is at liberty to measure any tree or log or count rings at any time in order to obtain sylvicultural or other statistics, and for that purpose the department may place chalk, tar, pencil or other temporary marks on any tree or log.

17. All logs must be cross sawn and departmental saws if available will be supplied on a payment of Rs. 5 (five) for each saw for the season.

18. When logs are being dragged, the contractor must depute one man solely to attend on the dragging by each elephant in order to remove obstructions from the logs or elephants.

19. The contractor will be responsible for any fire that may be caused in the forests by his negligence or that of his agents, coolies or cartmen.

20. The contractor shall be allowed time till 1st June 1915 for the removal of the logs stored in the coupe forest depots and any log not removed beyond the limits of the coupes by the last day abovenamed will be the property of the Government and the contractor shall have no claim to the same or to a refund of any expenditure incurred by him in the felling, chipping or dragging thereof nor for the amount paid by him on account of such logs.

21. If the contractor has sold any logs and the purchaser fails to remove them within the time prescribed the department has no concern with the purchaser and the contractor shall be liable for any suit which the purchaser may file. No transfer of the contract can be effected without the sanction of the District Forest Officer and no such transfer will be considered valid unless the same is executed by a power of attorney presented in person and the transferee certifies that he agrees to abide by these conditions.

22. The contractor may not dispose of branch-wood or any wood he does not use himself to others without obtaining the permission of the District Forest Officer.

23. No extension of time will be allowed to the contractor under any circumstances.

Any breach of any of the above conditions will entail cancellation of the contract with effect from the date of such breach and forfeiture without compensation of all timber whether cut or standing remaining in the reserve on that date.

Conditions for cubic foot contract.

1. Felling shall commence from 1st May and close before the 30th November 1914. All trees must be cut as close to the ground as possible (without defacing the hammer mark) in order to avoid unnecessary waste of timber. There shall be a fine of Rs. 5 per day for every day's delay in commencing the work after the 1st May 1914.

2. The contractor shall continuously employ not less than 25 men throughout the period of felling and it will be necessary therefore for him to have at least 50 men on his rolls. The contractor must pay the coolies regularly on every Saturday evening punctually for all work done during the week. For this purpose the contractor must keep his local agent amply supplied with funds in good time.

3. The trees shall be felled by sub-coupes and in each sub-coupe continuously from north to south or vice versa in accordance with the requirements of condition 4. The contractor shall not commence

work in a new sub-coupe until the sub-coupe under working has been completely finished and inspected and passed and completed by the range officer.

4. In each sub-coupe the felling shall commence farthest away from the forest depots and the logs must be dragged in the order in which they are felled. By this means the debris of felled trees will not interfere with the dragging.

5. The contractor shall not deface or remove the tree number or the Range Stamp of any trees felled or to be felled.

6. The contractor shall fell only such trees as are marked for felling, a list of such trees being furnished to him. Felling shall be done in consecutive order. Picking and choosing will not be allowed.

7. The contractor is bound to fell all trees marked for felling and shall pay a fine of Rs. 10 per each marked tree left unfelled on the 30th November 1914. If trees happen to fall on to other trees and remain resting against them the contractor is to bring such trees to the ground then and there and not leave them in their dangerous position for days together.

8. Any tree felled which has not been marked will be charged Re. 1 per inch of girth measurement of the stump at ground level and the District Forest Officer is at liberty to levy Rs. 150 for each stump if the stumps are removed. As soon as a tree is felled by axemen, they are to see that the tree number is visible on the face of the trunk as well as on the stump.

9. If any tree not marked is damaged by the careless felling of a marked tree, the contractor shall pay a fine of not less than Rs. 10 for each such tree damaged.

10. The contractor is not entitled to hire any Government elephant. If any Government elephants are available the District Forest Officer may, if he likes, allow their use on a payment of Rs. 5 per day for each elephant. A sum of Rs. 500 should be deposited in the Post Office Savings Bank as security for the prompt payment of elephant hire. All logs to be dragged by departmental elephants shall have the drag hole ends sloped off from each side towards the centre so that the logs may tend to ride over the ground instead of cutting into it. The elephants will not be worked for more than 20 days (20) in a month and the working hours will be 8 to 10 A.M. in the morning and 2 to 5 P.M. in the evening in the months of December, January and February and in the other months from 11 to 4 P.M. No elephant is to drag a log of more than 50 cubic feet and no elephant is to be used for dragging after 31st January 1915. When hoisting logs above 80 cubic feet for sawing the contractor is to employ more than one elephant. The contractor or his maistry must have the sawing pits dug close to the trees to be sawn and not far away from it which entails unnecessary dragging on the elephants. Range Officer will issue a Bill for the hire of elephants at the end of each month and the amount must be paid within 15 days of receipt of the bill. Each Government elephant has a prescribed maximum beyond which it may not drag. This schedule of working maximum will be supplied to the contractor. The contractor, if he decides to remove logs exceeding the maxima set forth in the schedule, will have to make his own arrangements for extracting such logs.

11. The contractor is at liberty to engage other than departmental elephants and shall pay for the green fodder consumed by such elephants the seignorage fees at Rs. 7-8-0 per mensem for each elephant.

12. All the converted logs will be dragged to forest depots selected by the Range officer in each sub-coupe which shall be situated as far as possible on the road side in convenient localities wherefrom further transport by carts can be easily effected. There shall not be more than two such depots in any sub-coupe. All logs left in the sub-coupes undragged to depots on 31st January following the date of sale will be the sole property of Government and the contractor shall have no claim to them nor reimbursement of any expenditure incurred by him on account of such logs.

13. The department will not be responsible for any damage any felled logs or trees may suffer while within the limits of the forests.

14. As soon as a sufficient number of logs has been dragged to the forest depot the contractor or his agent shall inform the Range officer of the same and the Range officer will measure them in the presence of the contractor or his authorized agent who shall countersign the measurement list in token of acceptance and only after receipt of payment shall the Range officer sale hammer the logs before further removal. No logs shall be removed from the depots before being so paid for and sale hammered.

(a) The cubical contents of the square and round logs will be obtained by taking the full length of the log and the girth in the middle and calculating the cubical contents from Kunhial's measurement book, the contents so obtained must be accepted by the contractor as correct.

(b) If any exceptional cases occur (such as dragging by elephants) in which a drag hole has to be cut, the cubical contents of the square and round logs will be obtained by taking the length of the log from the drag hole to the farthest end, the girth in the middle and calculating the cubical contents from Kunhial's measurement book. The contents so obtained must be accepted by the contractor as correct provided that if the drag hole is cut unnecessarily far from the end the full length of the log will be taken in the calculation.

(c) The cubical contents of partly sawn logs will be obtained by taking the length of the logs from the drag hole to the farthest end and the girth of the arc at the middle, i.e., this arc is to be treated as a semicircle and the cubical contents calculated as half those of a log having a girth equivalent to twice arc. The contents so obtained shall be accepted as correct by the contractor.

(d) The contractor or his agent shall be present after due notice has been given of the time of measurement. If he has any objection to make he must do it in writing to the District Forest officer on the same day. Failing such objection and whether he is present or not after due notice has been given, the Range officer's measurement must be accepted as correct and the logs will thenceforward be at the contractor's risk.

(e) The contractor will be furnished with a list of logs measured noting the length, girth and cubical contents of each individual log.

(f) The contractor may fashion the heads and butts as he likes. He is expected to utilize as many of the head pieces as he can.

(g) The contractor shall pay for the timber at the following rates:—

Teak, first class, over 14 c.ft. at	per c.ft.	
Do. heads and butts consisting of pieces below 14 c.ft. at		per cart-load of 40 c.ft.
Vengat timber, all logs above 14 c.ft. at	per c.ft.	
Do. heads and butts consisting of pieces below 14 c.ft. at		per cart-load of 40 c.ft.
Blackwood timber irrespective of classes at	per c.ft.	
Benteak timber irrespective of classes at	per c.ft.	
Mathi and other junglewood of classes at	per c.ft.	
And remove only such quantities as have been paid for.		

15. The department is at liberty to measure any tree or log or count rings at any time in order to obtain sylvicultural or other statistics and for that purpose the department may place chalk, tar, pencil or other temporary marks on any tree or log.

16. All logs must be cross sawn and departmental saws if available will be supplied on a payment of Rs 5 for each saw for the season.

17. When logs are being dragged, the contractor must depute one man solely to attend on the dragging by each elephant in order to remove obstructions from the logs or elephants.

18. The contractor will be responsible for any fire that may be caused in the forests by his negligence or that of his agents, coolies or cartmen.

19. The contractor shall be allowed time till 1st June 1915, for the removal of the logs stored in the coupe forest depots and any log not removed beyond the limits of the coupes by the last day abovenamed will be the property of the Government and the contractor shall have no claim to the same or to a refund of any chipping or dragging thereof nor for the amount paid by him on account of such logs.

20. If the contractor has sold any logs and the purchaser fails to remove them within the time prescribed the department has no concern with the purchaser and the contractor shall be liable for any suit which the purchaser may file. No transfer of the contract can be effected without the sanction of the District Forest Officer and no such transfer will be considered valid unless the same is executed on stamped paper and the transferee agrees to abide by these conditions.

21. The contractor may not dispose of branch wood or any wood he does not use himself to others without obtaining the permission of the District Forest Officer.

22. No extension of time will be allowed to the contractor under any circumstances.

23. Any breach of any of the above conditions will entail cancellation of the contract with effect from the date of such breach and forfeiture of all money paid or deposited by the contractor.

3. The above figures are the district figures but can not be guaranteed.
4. Tender must be sent in registered covers to the address of the District Forest Officer, North Malabar, Madanapada, and clearly marked on the outside of the cover with the words "Tenders for standing trees". The tenders will be opened by the District Forest Officer on the 15th February 1914 and each tender must be accompanied by deposit of Rs. 500 in the name of the District Forest Officer as forest deposit and not as forest remittance. Money orders or notes will not be received, and if sent no responsibility on them will be accepted. The deposit of unsuccessful tenderers will be returned as soon as possible.
5. Each tender must refer to the whole area to be felled in the coupe and the tenderer may offer a lump sum for the whole area or a rate per acre of each kind of timber extracted.
6. The successful tenderer will, within a fortnight of the receipt of the intimation of the acceptance of his tender or tenders, execute an agreement with the District Forest Officer. For each day's delay (through the fault of the contractor beyond the time allowed) to execute the agreement, the contractor will be fined Rs. 1. Some of the essential conditions of the agreement are:—
 - (a) The contractor should deposit a sum of Rs. 1,000 for the due fulfilment of the contract.
 - (b) The contractor must begin work punctually on 1st May with at least 35 coolies always on the work for the period of the contract and to ensure this there must be at least 50 coolies on the contractor's roll. There shall be a fine of Rs. 5 per day for every day's delay in the commencement of the work after the 1st May 1914.
 - (c) The contractor must undertake to exercise personal supervision and not leave the work entirely to his agents and further the contractor must inspect the work within seven days of being required to do so by the District Forest Officer.
 - (d) The contractor must pay the coolies punctually and regularly at intervals not exceeding seven days.
 - (e) The contract is based on the actual experience of past years and there is nothing in it which is unreasonable and consequently the terms of the contract will be strictly enforced.
 - (f) The supply of elephants will not be guaranteed, but any departmental elephant, at the option of the District Forest Officer, may be supplied at the usual rates of hire subject to the rules of the department regulating their use.
7. The period of contract will be one year from 1st May 1914 to 1st May 1915 and in the case of lump sum contract the amount of the contract must be paid in two equal instalments on or before 1st June and 1st August 1914. Failure to make payments on the due dates entails cancellation of the contract and forfeiture of all wood unremoved; the District Forest Officer may however condone late payment if sufficient cause is shown and interest at the rate of 6 per cent. per annum is paid on the arrears from the due date to the actual date of payment.
8. The District Forest Officer is not bound to accept the highest or any tender.
9. Further particulars can be had on application to the undersigned.
10. The contractors must read the tender notice carefully and confine their tenders to the terms of the notice; failing which their offer will be treated as per tender notice.
11. The usual upkeep of roads will be made by this department, but if this is not sufficient the contractor must do any further work required himself.

Conditions of Lump Sum Contract.

1. Felling shall commence from 1st May and close before 30th November 1914. All trees must be cut as close to the ground as possible (without defacing the hammer mark) in order to avoid unnecessary waste of timber. There shall be a fine of Rs. 5 per day for every day's delay in commencing the work after the 1st May 1914.
2. The contractor shall continuously employ not less than 35 men throughout the period of felling and it will be necessary therefore for him to have at least 50 men on his rolls. The contractor must pay the coolies regularly on every Saturday evening punctually for all work done during the week. For this purpose the contractor must keep his local agent amply supplied with funds.
3. The trees shall be felled by sub-coups and each sub-coupe continuously from north to south or *vice versa* in accordance with the requirements of condition 4. The contractor shall not commence work in a new sub-coupe until the sub-coupe working has been completely finished and inspected and passed by the Range Officer.
4. In each sub-coupe the felling shall commence farthest away from the forest depots and the logs must be dragged in the order in which they are felled. By this means the debris of felled trees will not interfere with the dragging.
5. The contractor shall not deface or remove the tree number or the range stamp or the stamp of any tree felled or to be felled.
6. The contractor shall fell only such trees as are marked for felling, a list of such trees being furnished to him.
7. The contractor is bound to fell all trees marked for felling and shall pay a fine of Rs. 10 per marked tree left unfelled on the 30th November 1914. If trees happen to fall on to other trees and remain resting against them the contractor is to bring such trees to the ground then and there and not leave them in their dangerous position for days together.
8. Any tree felled which has not been marked will be charged Rs. 1 per inch of girth measurement of the stump at ground level and the District Forest Officer is at liberty to levy Rs. 150 for each stump if the stumps are removed. As soon as a tree is felled by axemen they are to see that the tree number is visible on the face of the trunk as well as on the stump.
9. If any tree not marked is damaged by the careless felling of a marked tree, the contractor shall pay a fine of not less than Rs. 10 for each such tree damaged.

10. The contractor is not entitled to hire any Government elephant. If any Government elephants are available, the District Forest Officer may, if he like, allow their use on a payment of Rs. 5 per day for each elephant. A sum of Rs. 500 should be deposited in the Post Office Savings Bank as security for the prompt payment of charges for hire. All logs to be dragged by departmental elephants shall have the drag hole ends sloped at from each side towards the centre, so that the log may tend to ride over the ground instead of cutting into it. The elephants will not be worked for more than 20 days (20) in a month and the working hours will be from 8 to 11 A.M. in the morning and from 2 to 5 P.M. in the evening in the months of December, January and February and in the other months from 11 A.M. to 4 P.M. No elephant is to drag a log of more than 50 c.ft. and no elephant is to be used for dragging after 31st January 1915. When hoisting logs above 80 c.ft. for sawing the contractor is to employ more than one elephant. The contractor or his mastery must have the sawing pit ~~placed close to~~ close to the tree to be sawn and not far away from it which entails unnecessary dragging on the elephant. Range officer will issue a bill for the hire of elephants at the end of each month and the amount must be paid within 15 days of receipt of the bill. Each Government elephant has a prescribed maximum beyond which it may not drag. This schedule of working maximum will be supplied to the contractor. The contractor, if he decides to remove logs exceeding the maxima set forth in the schedule, will have to make his own arrangements for extracting such logs.

11. The contractor is at liberty to engage other than departmental elephants and shall pay for the green fodder consumed by such elephants the seignorage fees at Rs. 7-8-0 per mensem for each elephant.

12. All the converted logs will be dragged to forest depots selected by the range officer in each sub-coupe which shall be situated as far as possible on the road side in convenient localities wherefrom further transport by carts can be easily effected. There shall not be more than two such depots in any sub-coupe. All logs left in the sub-coupes undragged to depots on 31st January following the date of sale will be the sole property of Government and the contractor shall have no claim to them nor reimbursement of any expenditure incurred by him on account of such logs.

13. The department will not be responsible for any damage any felled logs or trees may suffer while within the limits of the forests.

14. The contractor shall pay 50 per cent. of the contract amount by 1st June and the balance by the 1st August 1914.

15. As soon as a sufficient number of logs has been dragged to the forest depots the contractor or his agent shall inform the range officer of the same and the range officer will measure and sale hammer the logs before further removal. No logs shall be removed from the depots before being so sale-hammered.

16. The department is at liberty to measure any tree or log or count rings at any time in order to obtain sylvicultural or other statistics, and for that purpose the department may place chalk, tar, pencil or other temporary marks on any tree or log.

17. All logs must be cross sawn and departmental saws if available will be supplied on a payment of Rs. 5 (five) for each saw for the season.

18. When logs are being dragged, the contractor must depute one man solely to attend on the dragging by each elephant in order to remove obstructions from the logs or elephants.

19. The contractor will be responsible for any fire that may be caused in the forests by his negligence or that of his agents, coolies or cartmen.

20. The contractor shall be allowed time till 1st June 1915 for the removal of the logs stored in the coupe forest depots and any log not removed beyond the limits of the coupes by the last day abovenamed will be the property of the Government and the contractor shall have no claim to the same or to a refund of any expenditure incurred by him in the felling, chipping or dragging thereof nor for the amount paid by him on account of such logs.

21. If the contractor has sold any logs and the purchaser fails to remove them within the time prescribed the department has no concern with the purchaser and the contractor shall be liable for any suit which the purchaser may file. No transfer of the contract can be effected without the sanction of the District Forest Officer and no such transfer will be considered valid unless the same is executed by a power of attorney presented in person and the transferee certifies that he agrees to abide by these conditions.

22. The contractor may not dispose of branch-wood or any wood he does not use himself to others without obtaining the permission of the District Forest Officer.

23. No extension of time will be allowed to the contractor under any circumstances.

Any breach of any of the above conditions will entail cancellation of the contract with effect from the date of such breach and forfeiture without compensation of all timber whether cut or standing remaining in the reserve on that date.

Conditions for cubic foot contract.

1. Felling shall commence from 1st May and close before the 30th November 1914. All trees must be cut as close to the ground as possible (without defacing the hammer mark) in order to avoid unnecessary waste of timber. There shall be a fine of Rs. 5 per day for every day's delay in commencing the work after the 1st May 1914.

2. The contractor shall continuously employ not less than 35 men throughout the period of felling and it will be necessary therefore for him to have at least 50 men on his rolls. The contractor must pay the coolies regularly on every Saturday evening punctually for all work done during the week. For this purpose the contractor must keep his local agent amply supplied with funds in good time.

3. The trees shall be felled by sub-coupes and in each sub-coupe continuously from north to south or *vice versa* in accordance with the requirements of condition 4. The contractor shall not commence

work in a new sub-coupe until the sub-coupe under working has been completely finished and inspected and passed and completed by the range officer.

4 In each sub-coupe the felling shall commence furthest away from the forest depots and the logs must be dragged in the order in which they are felled. By this means the debris of felled trees will not interfere with the dragging.

5 The contractor shall not deface or remove the tree number or the Range Stamp of any trees felled or to be felled.

6 The contractor shall fell only such trees as are marked for felling, a list of such trees being furnished to him. Felling shall be done in consecutive order. Picking and choosing will not be allowed.

7 The contractor is bound to fell all trees marked for felling and shall pay a fine of Rs. 10 per each marked tree left unfelled on the 30th November 1914. If trees happen to fall on to other trees and remain resting against them the contractor is to bring such trees to the ground then and there and not leave them in their dangerous position for days together.

8 Any tree felled which has not been marked will be charged Rs. 1 per inch of girth measurement of the stump at ground level and the District Forest Officer is at liberty to levy Rs. 150 for each stump if the stumps are removed. As soon as a tree is felled by axemen, they are to see that the tree number is visible on the face of the trunk as well as on the stump.

9 If any tree not marked is damaged by the careless felling of a marked tree, the contractor shall pay a fine of not less than Rs. 10 for each such tree damaged.

10 The contractor is not entitled to hire any Government elephant. If any Government elephants are available the District Forest Officer may, if he likes, allow their use on a payment of Rs. 5 per day for each elephant. A sum of Rs. 500 should be deposited in the Post Office Savings Bank as security for the prompt payment of elephant hire. All logs to be dragged by departmental elephants shall have the drag hole ends sloped off from each side towards the centre so that the logs may tend to ride over the ground instead of cutting into it. The elephants will not be worked for more than 20 days (20) in a month and the working hours will be 8 to 10 A.M. in the morning and 2 to 5 P.M. in the evening in the months of December, January and February and in the other months from 11 to 4 P.M. No elephant is to drag a log of more than 50 cubic feet and no elephant is to be used for dragging after 31st January 1915. When hoisting logs above 50 cubic feet for sawing the contractor is to employ more than one elephant. The contractor or his mistry must have the sawing pit dug close to the trees to be sawn and not far away from it which entails unnecessary dragging on the elephants. Range Officer will issue a Bill for the hire of elephants at the end of each month and the amount must be paid within 15 days of receipt of the bill. Each Government elephant has a prescribed maximum beyond which it may not drag. This schedule of working maximum will be supplied to the contractor. The contractor, if he decides to remove logs exceeding the maxima set forth in the schedule, will have to make his own arrangements for extracting such logs.

11 The contractor is at liberty to engage other than departmental elephants and shall pay for the green fodder consumed by such elephants the seignorage fees at Rs. 7-8-0 per mensem for each elephant.

12 All the converted logs will be dragged to forest depots selected by the Range officer in each sub-coupe which shall be situated as far as possible on the road side in convenient localities wherefrom further transport by carts can be easily effected. 13 The Department will not be responsible for any damage any felled logs or trees may suffer while within the limits of the forests.

14 As soon as a sufficient number of logs has been dragged to the forest depot the contractor or his agent shall inform the Range officer of the same and the Range officer will measure them in the presence of the contractor or his authorized agent who shall countersign the measurement list in token of acceptance and only after receipt of payment shall the Range officer sale hammer the logs before further removal. No logs shall be removed from the depots before being so paid for and sale hammered.

(a) The cubical contents of the square and round logs will be obtained by taking the full length of the log and the girth in the middle and calculating the cubical contents from Kunhilal's measurement book, the contents so obtained must be accepted by the contractor as correct.

(b) If any exceptional cases occur (such as dragging by elephants) in which a drag hole has to be cut, the cubical contents of the square and round logs will be obtained by taking the length of the log from the drag hole to the farthest end, the girth in the middle and calculating the cubical contents from Kunhiyalal's measurement book. The contents so obtained must be accepted by the contractor as correct provided that if the drag hole is cut unnecessarily far from the end the full length of the log will be taken in the calculation.

(c) The cubical contents of partly sawn logs will be obtained by taking the length of the logs from the drag hole to the farthest end and the girth of the arc at the middle, i.e., this arc is to be treated as a semicircle and the cubical contents calculated as half those of a log having a girth equivalent to twice arc. The contents so obtained shall be accepted as correct by the contractor.

(d) The contractor or his agent shall be present after due notice has been given of the time of measurement. If he has any objection to make he must do it in writing to the District Forest officer on the same day.
